

Victoriya came into our lives when my husband was diagnosed with cancer. Victoriya was very understanding of our needs, what services were important for us to be in contact with; she got us connected to the right resources with great efficiency. Because of her help we have the resources that we needed to cope with the cancer situation, not only that, she has kept in constant touch with us to make sure our needs are still being met. We are really grateful to have a person such as Victoriya in our lives. I would definitely recommend her to my family and friends because I know that they would be in good hands.
